SUGGESTIONS: 1) In the beginning, assume that all study will be completed on weekdays. 2) Total the daily hours of study needed, and multiply by 5 to get the weekly total of study hours needed (see far right).

The Method

- 1) Place all **scheduled** classes & activities.
- 2) Estimate daily requirements for **study time** (assignments & homework; see right).
- 3) **Schedule study time.**

Need to find 8 more hours!

The Method

- 1) Place all **scheduled** classes & activities.
- 2) Estimate daily requirements for **study time** (assignments & homework; see right).
- 3) **Schedule study time.**
